Subject: TippingPoint Product Announcement

Trend Micro™ TippingPoint is pleased to announce the release SMS v5.2.0 and TPS v5.2.0 software.

New Products:

- ❖ **Cloud Network Protection for AWS, powered by TippingPoint**
 - TippingPoint IPS technology now available on Amazon Web Services (AWS) Marketplace, providing transparent inline network security control, fully managed by SMS.
- ❖ **TippingPoint 1-segment 40GbE bypass module for TX platforms**
 - TippingPoint now offers a 40GbE bypass version of its IO modules for TX platforms, available in both short-range and long-range options.

Software Releases

❖ **Security Management System (SMS) v5.2.0**

The TippingPoint SMS delivers enterprise-class security management capabilities for the portfolio of TippingPoint Network Security Products. SMS 5.2.0 includes support for TPS TOS v5.2.0 for the 440T, 2200T, 1100TX, 5500TX, 8200TX, 8400TX, vTPS and Cloud Network Protection.

- Full management support for Cloud Network Protection
- RADIUS group mapping authenticates login requests on the SMS
- Users can configure a TPS device to use the SMS as a remote authentication server
- Schedule distributions for Auxiliary Digital Vaccines (ThreatDV)
- Usability enhancements for ordering a large list of Traffic Management Filters
- Improved Profile and DV distribution times
- API and many other enhancements and fixes, please refer to the release notes for a complete list

SMS v5.2.0 is available for all supported SMS hardware and virtual appliances. Software upgrades are supported from SMS v4.4 and later.

❖ **Threat Protection System (TPS) v5.2.0**

The TippingPoint TOS v5.2.0 for Threat Protection System (TPS) is supported on the 440T, 2200T, 1100TX, 5500TX, 8200TX, 8400TX and vTPS.

- Support for 40GbE Bypass IO Module on TX platforms
- Support for stacking TX devices using QSFP+ transceivers, allowing for greater distance separation than the current 1M AOC cable permits
- Inspection of VXLAN encapsulated traffic

- Device authentication can now use SMS as the remote authentication source (similar to N/NX devices)
- Plus many other enhancements and fixes, please refer to the release notes for a complete list

TPS v5.2.0 is available for all supported TPS hardware and virtual appliances. Software upgrades are supported from TPS v5.0.1 and later.

For a complete list of enhancements and changes, refer to the product Release Notes. For Release Notes and other product documentation, go to <http://docs.trendmicro.com>.

Recommended action:

Test and certify SMS v5.2.0 and TPS v5.2.0 at your earliest convenience.

Service offerings:

Trend Micro TippingPoint will offer Technical Assistance Center (TAC) or professional service assistance to help in qualifying this new software release for your network. Contact your local Sales Engineer or TAC for additional assistance with this process.

For questions or technical assistance, on any TippingPoint product, contact the TippingPoint Technical Assistance Center (TAC).

Thank you,
Trend Micro™ TippingPoint
