To: Trend Micro™ TippingPoint Customers

Subject: TippingPoint Product Announcement

Trend Micro™ TippingPoint is pleased to announce the release of the following new products and software releases.

TPS family capabilities:

- **Integrated Protection:** The TPS family of products integrates with TippingPoint Advanced Threat Protection; rated as the most effective "Recommended" breach detection system by NSS Labs, to detect and block targeted attacks and advanced threats.
- **Enterprise vulnerability Remediation (eVR):** Enables customers to pull in information from various vulnerability management and incidence response vendors, map Common Vulnerabilities and Exposures (CVEs) to TippingPoint Digital Vaccine filters and take action accordingly.
- **Upgradable capacity license:** Flexible licensing options are available for the 440T and 2200T to increase the inspection capacity.
  - **440T upgradeable to 1Gbps inspection throughput**
  - **2200T upgradeable to 2Gbps inspection throughput**

New Products:

❖ **Threat Protection System (TPS) model 2200T – SKU# TPNN0005**

The 2200T appliance delivers the highest level of defense against network intrusion and provides application control. The 2200T device includes:

- **2Gbps Inspection Throughput:** Inspect up to 2Gbps aggregate across all ten segments
- **On-box SSL:** Enables enterprises the ability to reduce the security blind spots created by encrypted traffic. Delivers in-bound SSL decryption in this release helping safeguard your customer's valuable web servers.

❖ **Virtual Threat Protection System (vTPS) – SKU# TPNM0034**

The new Virtual Threat Protection System (vTPS) extends the reach of the TPS family - providing network based IPS protection as a virtual appliance. The vTPS is powered by DVLabs security intelligence and can be managed by the TippingPoint Security Management System (SMS) allowing you to share security policy across your entire deployment. Supported environments include VMWare ESXi 5.5, 6.0, KVM and OpenStack.

Deployment options include:
- o Offer IPS as a service to protect virtualized applications from within your virtualized infrastructure.
- o Deploy IPS in a consolidated set of virtualized infrastructure services at remote branches.
- o Deploy IPS where IPS services are needed but where custom hardware may not be an option.
- o Lab environments where virtual infrastructure can be quickly redeployed.

Software Releases

❖ **Security Management System (SMS) 4.4.0**

The TippingPoint SMS delivers enterprise-class security management capabilities for the portfolio of TippingPoint Network Security Products. SMS 4.4.0 enhances its support to include:

- o Support for the latest TPS TOS and TPS platforms including TPS TOS 4.1, the 2200T and the vTPS platform.
- o Updated support for X509 certificate/private key pairs - providing advanced key protection options and ease of management when deploying the 2200T and SSL decryption.
- o TLS enhancements designed to comply with the latest PCI DSS crypto requirements for administrative access.
- o Notification emails sent from the SMS can now be optionally aggregated over a configurable time period.
- o vSMS updates include:
    - o Adding KVM hypervisor support
    - o Removing the VMWare vCenter requirement when deploying on VMWare ESXi
    - o vSMS Essential adds supports for the 2200T and vTPS products
- o Support for CAC (Common Access Card) based authentication

❖ **TippingPoint Operating System (TOS) 4.1.0 for Threat Protection System (TPS)**

TPS 4.1.0 is a maintenance release that includes the following features:

- o Best Effort mode (2200T only)
- o 32 Inspection bypass rules
- o Inspection of tunneled traffic
- o IPv6 inspection and management
- o SSL inspection (2200T only)
- o Throughput upgrades
- o VLAN translation

❖ **TippingPoint Operating System (TOS) 4.0.1 for Virtual Threat Protection System (vTPS)**

TPS TOS 4.0.1 and the new 4.0 version of the Digital Vaccine is currently available only for the vTPS. Please note that the vTPS platform running TOS 4.0.1 does not yet support pre-disclosed ZDI filters.

❖ **TippingPoint Operating System (TOS) 1.2.2 for Next Generation Firewall (NGFW)**
TOS 1.2.2 is a maintenance release for NGFW that contains several updates.

For a complete list of enhancements and changes, refer to the product Release Notes. For Release Notes and other documentation, go to https://tmc.tippingpoint.com/TMC/.
